

WHO'S WATCHING **YOUR** GENERATORS?

OMNIMETRIX
GLOBAL MONITORING + CONTROL

WE MAKE GENERATOR SYSTEMS MORE RELIABLE.

Even though today's standby power systems are extremely reliable, they are still subject to fail-to-start events. Give your business an advantage with OmniMetrix monitoring systems. We monitor generator systems day-after-day, second-after-second (31,536,000 seconds every year, actually) and alert you immediately of all alarm conditions.

With over 16 years of dedicated service in wireless remote generator monitoring, OmniMetrix is revolutionizing the on-site power market around the globe.

What are the consequences if your Generator System failed to Start?

- Life/Safety?
- Security Concerns?
- Financial Loss?
- Regulatory Compliance?

SMARTSERVICE™

Eliminates 95% of Fail-to-Start Situations

Today more than 10% of all installed generators are unable to start and carry a load. These potential failures are rarely mechanical problems. OmniMetrix monitoring allows you to accurately pinpoint systems that could potentially fail-to-start.

Key Failures:

- Low Battery Voltage
- Low Coolant Temperature
- Missed Exercise
- Low Fuel
- Unhandled Systems Alarms
- Plus Many More!

CONNECTED TO YOUR BOTTOM LINE.

OMNIVIEW®

Our Data Management Center, OmniView®, is the real power behind the monitoring system. It connects you instantly to real-time data and historical information on an entire fleet, or you may view diagnostics on a single unit.

Unit Status

- System or Fleet Diagnostics
- Daily Usage / Run Hours
- Site Comparisons
- Remote Testing

Alarms

- Instant Alarm Notification via Email or SMS Text
- Detailed Alarm / Fault Display

Location

- GPS Mapping
- GPS Landmarking
- Zone Reporting

History Reports

- Standard & Custom Reporting
- Data Exporting

Security

- Secure & Redundant Service with Data Archiving
- Remote Management
- Data Recovery

Trouble Tickets

- Alarm Escalation Service
- Customized Administration
- Resolution Management

KNOW BEFORE YOU GO!

The SmartService™ Advantage gives service providers the capability to review a generator's history BEFORE climbing into a truck. Better knowledge means a higher first trip success rate and increased profits!

WHAT LEVEL OF SERVICE DO YOU PREFER?

31,536,000 vs. **2 to 4**
TIMES PER YEAR TIMES PER YEAR

MONITORING SOLUTIONS TO FIT YOUR NEEDS.

OmniMetrix wireless remote monitoring systems provide reliable, cost effective solutions for backup power monitoring for a single unit, multiple units and mobile units. The OmniMetrix system connects to **all major brands of generators**, and is modbus compatible for access to diagnostic information directly from the genset and transfer switch controls.
